

November 2009

The Delmar Loop Planet Walk, a walking scale-model of the solar system, will officially open on Sunday, Nov. 8. The walk imparts a real appreciation of how far away and apart the planets are. At its 1:5 billion scale, the sun is about 10 inches in diameter, and the Earth is a small speck just 95 feet away. The walk stretches 2,800 feet, beginning with the sun at the Moonrise Hotel and ending with Neptune at Cicero's restaurant. A signpost with interesting facts marks the location of each planet. For more information visit www.LoopPlanetWalk.com

The Delmar Loop Planet Walk will open with a "Big Bang" Launch Party and Reception at the Moonrise Hotel (open to the public), culminating in an unveiling and inaugural walk led by Joe Edwards.

When:

Sunday, November 8
2 p.m.

Where:

Moonrise Hotel
6177 Delmar in the Loop
St. Louis, MO 63112
